

Write a program which creates two threads, one thread displaying “BMS College of Engineering” once every ten seconds and another displaying “CSE” once every two seconds

```
class BmsThread extends Thread {  
    public void run()  
    {  
        try {  
            for(int i=0;i<10;i++)  
            {  
                System.out.println("BMS College of Engineering");  
                Thread.sleep(10000);  
            }  
        }  
        catch(InterruptedException e ) {  
            System.out.println("BmsThread Interrupted");  
        }  
    }  
}
```

```
class CsThread extends Thread {  
    public void run() {  
        try {  
            for(int i=0;i<10;i++)  
            {  
                System.out.println("CSE");  
                Thread.sleep(2000);  
            }  
        }  
    }  
}
```

```

    }
    catch(InterruptedException e ) {
        System.out.println("CsThread Interrupted");
    }
}
}

class program8{
    public static void main(String args[]) {
        new BmsThread().start();
        new CsThread().start();
    }
}

```

Output:

```

C:\Users\admin\OneDrive\Desktop\awt>javac program8.java
C:\Users\admin\OneDrive\Desktop\awt>java program8
